DECEMBER 17, 2007

Beneteau 40: Good Value in a Versatile Cruiser

This clean and purposeful cruiser won Best Midsize Cruiser in *CW's* 2008 Boat of the Year contest.

by Mark Pillsbury

Comfortable and stylish belowdecks and well organized topsides, the Beneteau 40 showed light-air performance on the waters off Annapolis last fall that hinted at good handling in a stiffer breeze and convinced the BOTY judges that this boat was a standout among the Midsize Cruisers.

The 40 is the latest in a line of new production cruisers from Beneteau. Its hull is straight from the drawing boards of Berret Racoupeau and features a fine entry, what BOTY judge Steve Callahan described as broad shoulders, and a fairly beamy transom under a wide cockpit and twin wheels.

Below, the straight-lined, modern interior comes from Nauta, the interior designer for the Beneteau range, which currently starts at 37 feet and includes a 43-footer, a 46-footer, and the 49-foot model that was a BOTY winner in 2007.

The boat the judges sailed in Annapolis was a two-cabin model with roomy aft and V-berth queen bunks, a head with separate shower to starboard at the foot of the companionway, and a compact, functional galley to port. Several opening ports and hatches provide ample ventilation and light, and the luster of the moabi mahogany woodwork is accented by off-white upholstery and panels throughout the saloon, making for airy and cheery surroundings throughout.

A roller-furling headsail and standard in-mast furling main make setting and dousing sails a simple task. Twin wheels provide good visibility of the rig on either tack.

Owners Notes:

Interior and exterior of the boat has been well maintained. Almost perfect condition of the upholstery and the wood, boat has never been chartered. Cruising speed on power is 5-6kts with average fuel consumption 2.5l/hr. at 2,000 rpm and on sail 6-7 kts with 15 kts wind getting one to destinations either under sail, power or both. Sails are easy to control, reef and adjust even shorthanded with 1 or 2 persons. Performance on way the boat feels solid, dry and comfortable heel ride even with winds up to 25 kts attaining speeds of 9+kts (with no reef on beam reach). As a live aboard 15 + 5 days in Busuanga, 10 days Zambales the boat feels comfortable to dine, entertain and sleep at anchorage with 7 guest. Entertainment in spacious cockpit, easy to manage

galley/saloon, large refrigerator/freezer makes entertaining and cruising with many guest as comfortable and relaxing as a larger sailboat boat can offer.

Equipment & Description:

Power & Rigging: Yanmar 3jh4e 40hp, 3 fixed blade propeller, Classic Mast with lazy bag, Roller furling Genoa UK Sails, Mid-deck located traveller, three 2-speed Lewmar winches and 1 powered winch.
